

Enthusiastic Teachers (ET) Zone

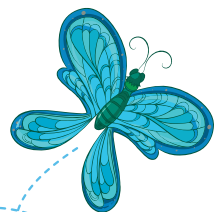

(Innovative activities for pre-schools along with the lesson for the kids to learn)

In a cosmopolitan culture and growing nuclear family structure, after parents, it is the pre-school teachers who contribute significantly for the development of kids. For a great learning, kids must love their teacher. There is a common attribute among all the loving teachers and that is displaying of a "Playful" attitude. Kids are attracted to those teachers who display a playful energy just like them, as kids are always interested and ready to play. They never get tired of playing and expect their teacher should maintain the same level of energy.

Almost all pre-schools have a lot of activities and engagements. But the great Pre-Schools have a tendency to ensure that "Life Lessons" are learned in each and every activity performed in the school involving children.

KIDS PACKET understands this fact very well and thus brings a section called "Enthusiastic Teachers Zone". Under this section we would be bringing various engagement activities for the children and with each engagement we would facilitate the teachers to ensure that the kids learn the life lessons from each activity.

We hope that the enthusiastic teachers in each and every pre-school would love to have the activities for their little curious students.

Contribution from the Enthusiastic Teachers (ET)

Each teacher is an innovator in their own terms and conditions. Each teacher contributes immensely for the development of kids. While we appreciate their efforts in developing kids for the responsible citizens, KIDS PACKET would love to publish their unique activities for the benefit of thousands of kids.

Kindly share your innovative and unique engagement activity at **kidspacket@gmail.com**, so that we would publish in your name along with your school. Just put "Engagement Activity for the Enthusiastic Teachers Zone- Your name (---)" in the subject line of the email.
